

Class description

Class description-student_login

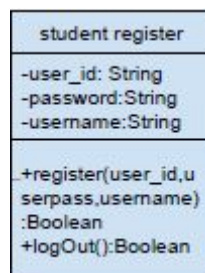

Description: This Student_login class model that student login System

Attribute:

No.	Name	Description	Type
1	user_id	The unique identifier student	String
2	password	Password of student	String
3	username	Username of student	String

Class description-student_register

Description: This Student_register class model that student register information

Attribute:

No.	Name	Description	Type
1	user_id	The unique identifier student	String
2	password	Password of student	String
3	username	Username of student	String

Class description-student_select

student select
-course_id: String -coursename:String -tuitionfee:String
+selectclass(course_id,coursename): Boolean +viewList():void +viewHistory():void +search:void +logOut():Boolean

Description: This Student_select class model that student view course information

Attribute:

No.	Name	Description	Type
1	course_id	The unique identifier course	String
2	coursename	Name of course	String
3	tuitionfee	tuitionfee of course	String

Class description-student_addclass

student addclass
-course_id: String -coursename:String -tuitionfee:String
+addclass(course_id,coursename,tuitionfee): Boolean +getcourse_id: String +getcoursename:String +gettuitionfee:String +addcalss:void +logOut():Boolean

Description: This Student_addclass class model that student add course

Attribute:

No.	Name	Description	Type
1	course_id	The unique identifier course	String
2	coursename	Name of course	String
3	tuitionfee	tuitionfee of course	String

Class method description

Class student_login

student login
-user_id: String
-password:String
-username:String
+login(user_id,userpass,username) :Boolean
+logOut():Boolean

Methods:

No.	Name	Description	Parameter List	Return Type
1	login	Use to login to the system	String user_id,userpass,username	boolean
2	logOut	Use to log out from the system	-	boolean

Class student_register

student register
-user_id: String
-password:String
-username:String
+register(user_id,userpass,username) :Boolean
+logOut():Boolean

Methods:

No.	Name	Description	Parameter List	Return Type
1	register	Use to register to the system	String user_id,userpass,username	boolean
2	logOut	Use to log out from the system	-	boolean

Class student_select

student select
-course_id: String -coursename:String -tuitionfee:String
+selectclass(course_ id,coursename): Boolean +viewList():void +viewHistory():void +search:void +logOut():Boolean

Methods:

No.	Name	Description	Parameter List	Return Type
1	selectclass	Use to select course class	String course_id,coursename	boolean
2	viewList	Use to view course list	-	void
3	viewHistory	Use to view course history	-	void
4	search	Use to search course	-	void
5	logOut	Use to log out from the system	-	boolean

Class student_addclass

student addclass
-course_id: String -coursename:String -tuitionfee:String
+addclass(course_id,coursename,tuitionfee): Boolean +getcourse_id: String +getcoursename:String +gettuitionfee:String +addcalss:void +logOut():Boolean

Methods:

No.	Name	Description	Parameter List	Return Type
1	addclass	Use to add course class	String course_id,coursename,tuitionfee	boolean
2	getcourse_id	Use to get course id	-	void
3	getcoursename	Use to get course name	-	void
4	gettuitionfee	Use to get tuitionfee	-	void
5	addcalss	Use to add calss	-	void
6	logOut	Use to log out from the system	-	boolean
